

### Reminder about PanGlobal Login Credential Access

---

PanGlobal's Power Engineering textbooks contain time-sensitive login credentials (unique User Name & Password printed on the front inside cover of the first book) which provide access to additional online resources and self-assessments. These credentials allow initial access to our Learning Management Systems within 3 years of the textbook print date.

After activation, the textbook's online access time frames vary depending on the product and begin after the initial log in. This 3-year initial activation access restriction is in place to ensure that the online resources accurately support the textbook content. **Bookstores and resellers are reminded not to carry over inventory that exceeds this access time.**

If you have additional questions about login credentials and access time, please view our [Knowledgebase Article on the subject](#), or submit a ticket and your personal inquiry will be addressed.
