

PanGlobal is proud to announce that our First Class textbooks have been receiving updates and will be released as Edition 2 in March 2021. These updates include:

- Updates to colour images
- Updates to code references
- Revision of sections relating to Thermodynamics and Applied Mechanics

Additionally, each volume of First Class (ed. 2) will be available for individual purchase. Those studying First Class will now be able to purchase each of the eight-volumes as their studies progress or as a full set to receive a discounted price.

eBooks for First Class (ed. 2) will continue to be available for purchase or subscription on a per-volume or set basis. The eBooks for Edition 2 will now support many of the eBook features our other class materials provide.

Both Edition 1.1 and the upcoming Edition 2 support the First Class 2012 syllabus established by SOPEEC and fulfill the learning outcomes and objectives set by IPECC.

As a part of the lead-up to Edition 2's release, we are massively discounting Edition 1.1. **Save up to 50%** on your preparation for First Class certification by [picking up a set today!](#)
